A real gem of a game. The whole atmosphere is mesmerising, everything looks so vibrant and alive. The animations are awesome and the character art is great. The soundtrack is an absolute banger, and without a doubt probably one of my personal favourites. It really captures that neon cyberpunk aesthetic perfectly. And the combat? The most crucial element? It knocked it right out of the ♥♥♥♥ing park. The ball is on the moon now. It's razor sharp and makes you feel like a badass. My only criticism would be that the random nature of the enemies' spawns will cause some ♥♥♥♥♥♥♥t combo drops and deaths, but the game can become so brutally difficult and frantic that you won't even know if what killed you was fair or not.

All in all, a real indie gem. Even at full price, it's a steal and can keep you busy with it's high replayability and cocaine-level addiction for hundreds of attempts.

9.5/10. This is a fun sequel to the original game! It felt like it might have been a little shorter, though it's still a pretty beefy puzzle game. I enjoyed the art, ambient soundtrack, and the ability to navigate with the keyboard arrows. Definitely worth the price!. After 2 hours of game time (that may look not enough to form an accurate opinion but that is my threshhold) decided to write a review about this game.

This game is a gem. It is fun to play (against bots and/or other players), performance is excellent and it is very easy to get the handle of it. The only "negative" (which does not really exist because you can play against AI) is the relativly small playerbase.

Personally i bought the game during the sale but i can safely say that this game is worth it regardless of original or discounted price.

 Yeah, i am not good at writing reviews :P
. The game is brilliant, not only does it have an amazing soundtrack but simple yet wonderful gameplay. Puzzles are rather straight forward though they do require a bit of thinking to actually complete successfully. It also Has 1 Graphics setting which is labeled as sexy, I found that amusing.. game is closed. The "Sleepy Hollow" dlc for Tales of Escape has to be my favourite of the bunch.
The story is that you're in a spooky graveyard for some reason and you need to find your way out.
The map looks decent just really dark. The 2d trees and plants are well not the best.
The first part of the map is pretty easy but after getting into the first room it get harder. The second half of the map requires alot of trial and error to get through. In the last part it gets a bit dumb but not too dumb.
It lacks some polish, some minor things like on Vr you can get the head out of the coffin in the church and that the steam achievement "Lost your head? I have enough for two..." it says "Sleepy Gollow" Instead of "Sleepy Hollow".
Still its pretty good.
I'd recommend buying it and making 1 or more of your friends also buy it.

Very simple but clean and well animated runner from Primitive Studio.

There's not much here, but the execution is the best I've seen so far within the Primitive Studio discount pack.

Definitely worth the $0.08 that I paid. If you can try it for the same price, I'd recommend it.. I love the concept here, and the design is really solid. The only complaint I have is that it gets boring really quickly. But if you have a few minutes to kill here and there it is certainly a good choice for that. Really cool design, and a really fantastic atmosphere.. The game is definitely interesting and playing with friends can be a lot of fun. There is still a lot to be done but it has a great potential.. Great game. The learning curve can be hard, especially since there isn't much information out there, but that's also part of the fun.. Good ole shmup fun. I am still working on Normal mode at this time, and I am loving every moment of it. The weapon upgrade system gives you some learning curve\/fun making you figure out which works best for each level\/enemy. There are moments where you have to quickly navigate through small areas while avoiding smashing into stuff\/getting blasted into scraps. \\m\/ (=_=) \\m\/ The Music gets me pumped, and the SFX are choice. The game isn't that long, but the harder difficulties give it decent replayability. I love this game. Classic Game Room Sent me. SATAAAZIUUUUUS!. its a good game! from turrets to TANKS! i just want to say ITS GREAT!. Great route spolied by speed signs on Driver's Guide being placed in wrong spot or missing altogether meaning constantly having to reload or make copious notes about the errors. How does such obvious errors and so many get past any competent beta testing program?
